

Adult Sialogram

Diagnostic Radiology (Outpatient)

Welcome:

We would like to welcome you to OSF Saint Francis Medical Center Diagnostic Radiology Department.

You have been scheduled to have a Sialogram. This is a diagnostic procedure using fluoroscopy (a form of x-ray). This test is used to look at the salivary gland and ducts.

The information contained in this pamphlet will help you understand the test that has been scheduled.

When to Come, Where to Park, and Where to Go:

Please arrive 45 minutes before the time of your scheduled test.

What to Bring with You:

You may have had x-rays done at a hospital other than OSF Saint Francis Medical Center. Please bring copies of the films with you the day of the test. You may also request that the doctor's office send the films or results to us at the hospital before your test.

Prep:

Nothing to eat or drink by mouth after 10 p.m. the day before your test.

Jewelry:

Please remove all jewelry from your head, mouth, and neck before your test.

PREGANCY TESTING POLICY

It is the policy of OSF Saint Francis Medical Center to conduct pregnancy tests on female patients having a CT, MRI, Nuclear Medicine, PET, Angiography, or X-ray exams of the abdomen area. This policy is to avoid potential harm to an unborn baby as a result of the radiation or medications given during the exam.

A pregnancy test is required prior to the procedures listed above and should be ordered by your physician if you are a female:

- Between the ages of 12 and 50 and have not had a hysterectomy
- Less than 12 years old and are having menstrual periods
- Over age 50 and having menstrual periods

The pregnancy test must be done within three days prior to your exam at any OSF Saint Francis facility. Home pregnancy tests are not acceptable.

If you have your pregnancy test done the day of the procedure:

- Arrive 30 minutes earlier if your are scheduled at any OSF Out Patient locations
- Arrive 60 minutes earlier if you are scheduled at Saint Francis Medical Center main campus hospital.

If you know that you are pregnant please notify your physician.

Medications:

You may take medication as prescribed with 2 to 3 sips of water.

Allergies:

You may receive contrast as part of the test. Contrast is something given to let a part of the body be seen on an X-ray. If you have any known allergies to iodine or X-ray contrast, please contact your ordering doctor. You may need to take special medications before having this test.

Test Instructions:

You may be asked to wear a hospital gown for the test. The test will be explained to you by a registered x-ray technologist and you will be asked to sign a consent form before the test starts. A registered x-ray technologist will help the Radiologist with your test. The test will take about 60 minutes. You will lie on an x-ray table under an x-ray tower.

A radiologist will put a tiny canula into different salivary ducts and inject contrast. Contrast allows your salivary ducts and surrounding areas to be seen on x-ray. The radiologist and x-ray technologist will take films.

Test Results:

Your test will be read by a Radiologist (doctor specializing in medical imaging). The radiologist will give a report that will be typed and sent to your doctor. You can make plans with your ordering doctor on how to get the test results (such as follow-up doctor appointment, calling the doctor's office, etc.).

After Test Instructions:

None
